

SANITIZER

<i>Product:</i>	DryTec® Calcium Hypochlorite Granular
<i>Active Ingredient:</i>	68% calcium hypochlorite
<i>Manufacturer:</i>	Arch Chemicals, Inc.
<i>Registered use pattern and rates:</i> <i>Label current as of February 2018</i>	To sanitize nonporous food contact surfaces, use a 200 ppm available chlorine solution to control bacteria, mold or fungi and a 600 ppm solution to control bacteriophage. Use spray equipment which can resist hypochlorite solutions. Thoroughly spray all surfaces until wet, allowing excess sanitizer to drain. Vacate area for at least two hours.
<i>Material Safety issues: SDS dated June 14, 2017</i>	Precautions for handling, use, and storage of DryTec® Calcium Hypochlorite Granular are on the SDS .
<i>Comments:</i>	Please see www.lonza.com for additional information.
