

SANITIZER

Product:	GC-30
Active Ingredient:	Sodium Chlorite: 30.5% Other ingredients: 69.5% Amount of Chlorine Dioxide generated = 0.05% in 24 liters of water
Manufacturer:	Selective Micro Technologies, LLC www.selectivemicro.com
Registered use pattern and rates: <i>Label current as of March 1, 2019</i>	Follow directions for use and general dilutions instructions found on label . GC-30 is used as a disinfectant and sanitizer on hard, non-porous surfaces (e.g. stainless steel, brass, glass, vinyl, PVC, polypropylene). Heavily soiled surfaces must be pre-cleaned prior to treatment. Apply by mop, sponge, or sprayer, ensuring visible wetness for times specified for these applications, or apply through immersion or clean-in-place application.
Material Safety Issues <i>SDS dated February 18, 2019</i>	Precautions for handling, use and storage of GC-30® are on the label and SDS . Use the proper personal protective equipment described on the label . Wear a NIOSH/MHSA-approved respirator appropriate for chlorine dioxide when using a high-pressured sprayer and under other circumstances detailed in the Technical Bulletin .
Comments:	GC-30 chlorine dioxide is registered with the FDA as an approved food contact substance for fruits, vegetables, mushrooms and truffles. Chlorine dioxide leaves no residual, and products can be eaten fresh, without a rinse after treatment, according to FDA approved use patterns. This product is an effective disinfectant/sanitizer on processing lines and equipment.
