

## SANITIZER

<b>Product:</b>	<b>Bac-Flush™</b>
<b>Active Ingredient:</b>	3.68% iodine, 23.70% phosphoric acid
<b>Manufacturer:</b>	Ecolab Inc. ( <a href="http://www.ecolab.com">www.ecolab.com</a> )
<b>Registered use pattern and rates:</b>  <b>Catalog Sheet</b>	Labeled for use in mushroom growing operations on food contact surfaces (FCS) and non-food contact surfaces.  For FCS: first clean growing trays, picking baskets, and picking utensils before sanitizing, then spray with 1.0 ounces of Bac-Flush per 13 gallons of water(25 ppm of titratable iodine) for at least 2 minutes. Drain thoroughly.  Please call the manufacturer at 1-800-392-3392 to obtain a product label. Refer to product label for complete directions for use.
<b>Material Safety issues:</b> <b>SDS dated February 17, 2015</b>	Review the <a href="#">SDS</a> for precautions for handling, use, and storage.
<b>Comments:</b>	Bac-Flush is registered by EPA as a hard surface food contact sanitizer; may stain porous surfaces; mid-level cost.
