

SANITIZER

Product:	Maquat® 10
Active Ingredient:	5% alkyl (C ₁₄ 60%, C ₁₆ 30%, C ₁₂ 5%, C ₁₈ 5%) dimethyl benzyl ammonium chloride 5.0% alkyl (C ₁₂ 68%, C ₁₄ 32%) dimethyl ethylbenzyl ammonium chloride
Manufacturer:	Pilot Chemical (www.pilotchemical.com)
Registered use pattern and rates: <i>Label current as of November 2017</i>	This product is approved for sanitizing food contact surfaces at a concentration up to 200 ppm active ingredient (total of all quaternary chemicals in the solution), prepared by mixing 1 ounce of the product in 4 gallons of water. No potable water rinse is allowed for this use. Non-food contact surface uses: For disinfection in the mushroom farm industry, use 3 oz. product per 5 gallons of water, wet all surfaces thoroughly, keep wet for 10 minutes. Let air dry. Preclean heavily soiled areas first. Prepare a fresh solution for each use. For heavy duty cleaning, use 6 oz. product per 5 gallons of water. Do not apply to the mushroom crop, compost or casing. Rinse treated surfaces with potable water before they contact the crop, compost or casing. Visit www.pilotchemical.com to obtain latest product information.
Material Safety issues: <i>SDS dated June 9, 2017</i>	Precautions for handling, use, and storage of Maquat 10 are on the SDS .
Comments:	Quaternary ammonium family. Clings to substances. Stable under low OM tolerances; does not easily dissipate.
